

The Fault in Our Stars by John Green

Summary: A young teen girl who has cancer used to never leave her house, when she decided to join a support groups that's when things changed. She finally met someone who also has cancer but is caring and cute. She happens to embarrass herself when they first meet but they end up making a beautiful love story.

Review: This book was amazing, the first book I actually wanted to keep reading. I rated it 5 stars because of how interesting it was. The book was written about a true story and that made it even more intriguing. I would recommend this book to anyone, I read it my freshman year and it was so good, and my mom read it and liked it as well so it works for any age groups. In the fault in our stars I responded most to the plot, it was about young kids and older people who are diagnosed with cancer which hits me hard because my grandparents both died of cancer. I was shocked in this book a lot of unexpected things occurred.
